

CHILD PHOTO ID KIT TIPS

A Recent, Good-Quality Photo

- The photograph should be a recent, head-and-shoulders color photo of your child in which his/her face is clearly seen.
- The photograph should not be: taken outside, out of focus, torn, poorly lit or very small.
- The photo should be an accurate depiction of your child and not overly posed or “glamorized.” Other people or animals should not be in the photo.
- The photo should be accompanied by an accurate, narrative description to help identify your child such as name, nickname, height, weight, sex, age, eye color, identifying marks, glasses, braces, etc.

ID Photo Kit Storage

- All copies of your child’s photos and information should be maintained in an easy-to-find, secure space accessible only by you.
- Photos and data should not be stored in a public database.

Digital ID Photos

- Digital ID photos should be saved with the highest possible resolution.
- Store the photo on common media formats such as CD-ROM or memory stick so it’s compatible with common computer operating systems. This allows your child’s image and information to be quickly transmitted electronically by law enforcement.

UPDATE THE PHOTO EVERY 6 MONTHS.

Safety Tips

Share these 7 Rules for Safety with your children:

- 1) Before I go anywhere, I always check first with my parents or the person in charge. I tell them where I am going, how I will get there, who will be going with me, and when I’ll be back.
- 2) I check first for permission from my parents before getting into a car or leaving with anyone, even someone I know. I check first before changing plans or accepting money, gifts, or drugs without my parent’s knowledge.
- 3) It is safer for me to be with other people when going places or playing outside. I always use the “buddy system.”
- 4) I say NO if someone tries to touch me in ways that make me feel frightened, uncomfortable or confused. Then I go and tell a grown-up I trust what happened.
- 5) I know it is not my fault if someone touches me in a way that is not O.K. I don’t have to keep secrets about those touches.
- 6) I trust my feelings and talk to grown-ups about problems that are too big for me to handle on my own. A lot of people care about me and will listen and believe me. I am not alone.
- 7) It is never too late to ask for help. I can keep asking until I get the help I need.

HOW TO USE THIS ID KIT

This section of the CubCare ID Kit will help you to be prepared in the event your child is missing. It will take just a few minutes for you to be prepared!

- A quality ID photograph is the single most important tool for recovering your child.
- Update all of this information every 6 months.
- Make sure your dentist maintains up to date dental records. If you relocate, take them with you.
- Know where your child's medical records are kept. If you relocate, obtain copies and take them with you.
- Do not attempt to fingerprint your child. Fingerprints are of no value unless properly taken. Many local police departments routinely fingerprint children as a public service. Store the prints with the CubCare ID Kit.
- Keep the documents safe, but where they are quickly and easily accessible.
- In the event your child is missing, do not delay. Immediately contact your local police. Then contact friends and family who may know the child's whereabouts. Present this CubCare ID Kit to the police. They will use it for dissemination of the ID photo and information to law enforcement agencies nationwide.
